

Stirling Ranges

Distance: Approx. 4km- 8km each day Duration: 5 Days / 4 Nights

Welcome to your next adventure with Inspiration Outdoors.
Here are a few details to help you get prepared...

Pick up and Drop Off:

We depart at 8am from the Tourist Coach Stand at 490 Wellington Street, near the corner of William Street in Perth (or 7.20am from Fremantle if requested). Keep an eye out for one of our friendly crew on an Inspiration Outdoors branded mini bus. Here is a google maps link for your reference. <https://goo.gl/maps/whNjBqLXayv>. And here's what it looks like at street level <https://goo.gl/maps/2E8bSdWsoHH2>

At the end of the tour, you will be dropped off to the same location in Perth at around 5.30pm. This will be confirmed closer to the time as it may alter slightly.

Departure City: **Perth**

Where should I stay the night prior to the tour?

With an early departure, we recommend a night in Perth for those coming from interstate or overseas. (The city of Perth is roughly 1/2hr away from the airport) There is no train line to Perth airport so your options are either a Taxi or an airport shuttle. The following hotels below are within easy walking distance from the pick up location.

- The Ibis on Murray Street
- The Comfort Inn on Murray Street
- Mantra on Murray
- Four Points by Sheraton on Wellington Street

****First day reminder****

Once we pick you up from either Perth or Fremantle it is a bit of a drive to the start of the track. Please come dressed in your walking attire with your day pack and water bottle ready to go. Your luggage will be stowed in a trailer and waiting for you at the accommodation when you return from your first days walk.

Washing facilities and Internet

There are washing machines available to use at your accommodation. This will give you the opportunity to wash any clothes items if needed. There is also free WiFi available.

Give us a call if you have any questions!
08 6219 5164 or walk@inspirationoutdoors.com.au

What should i pack?

- Day-pack – with a thick waist strap to help take some weight off your shoulders. In wet weather, a waterproof cover or a bin bag to wrap your belongings in can be handy
- Shorts/long pants and shirts for walking – as many sets as you wish! Quick-dry material is best, especially for trousers. Don't wear jeans walking.
- Socks – whichever thickness you're comfortable walking in and as many pairs as you like
- Boots/shoes for walking (make sure you wear them in well – see note on footwear below)
- Windcheater or lightweight jumper for walking
- Waterproof jacket*
- Sun protection – hat (secure fitting and/or with chin strap), sun cream, sun glasses
- Casual clothes for evenings
- Fleece jacket, gloves, beanie and/or thermals (can get quite cold in the evenings and early mornings)
- Torch/headlamp (can be handy when twin sharing for getting up at night)
- Any preferred first aid supplies – such as your favourite blister treatment! (Your guide will carry a full first-aid kit)
- Water bottle/s or camelback – 2 to 3 litre capacity

*You have to expect some bad weather at any time of the year down here so bring wet weather gear even if the forecast is fine.

Optional items

- Waterproof pants. Some people love them and some hate them – personally, we don't wear them but there have been times when we have wished for a pair!
- Head fly net (especially for walks in warmer weather)
- Camera and charger/batteries
- Gaiters for snake bite protection are recommended unless you are wearing long pants and long socks.

They're also good for keeping rock/dirt out of your shoes.

- Sock protectors (to keep little rocks out of your boots)
- A lunch container, to avoid squashing your sandwich or you may choose to only bring a salad (with freezer brick and fork if desired)
- Snacks and alcohol – we will try and give you the opportunity to purchase some on tour. Some people like to have some muesli bars, nuts, lollies etc
- Walking poles

Getting ready for your walk. . .

There is no such thing as an 'easy day' in the Stirlings. There are a lot of ups and downs which can be hard on the knees, thighs and glutes. However, the walks are achievable to those of reasonable fitness because you only carry a daypack and the distances are not long. A positive mental attitude is most important and that if you focus on the scenery, the company and the moment then you find yourself reaching your destination with little problem. If you have done some training prior to the walk you will enjoy it all the more.

The best way to prepare physically for the trip is to walk – preferably up and down steep hills, over a variety of terrain and surfaces. Try to walk frequently. By the start of our tour you should be able to comfortably walk 8 to 10km and be confident up and down hills.

In addition to walking, strength exercises such as squats will help get you up and down those hills. Here are links to three articles we've written on some simple exercises you can do to build muscle and prepare for your holiday:

Squats: <http://www.inspirationoutdoors.com.au/strength-training-exercises-you-can-do-at-home-squats/>

Balance, Hip-Raises and Lunges: <http://www.inspirationoutdoors.com.au/exercises-walking-holiday/>

Preparation for busy people: <http://www.inspirationoutdoors.com.au/too-busy-to-prepare-for-walking-tour/>

Looking after your feet

Footwear is very personal and we prefer people wear what feels comfortable. Walking shoes shouldn't be too tight, but your foot shouldn't slip around in them either. If you're buying new shoes, go shopping after a long walk so your feet are a bit swollen. The best places to buy walking boots/shoes will have some sort of ramp that you can stomp up and down on and make sure there is no pressure on your toes and heels.

Boots can provide ankle support and help keep the sand out. Some hiking boots can be quite heavy. These are great for cold weather alpine hiking but they do tend to tire your legs quicker and heat your feet. There are plenty of lightweight boots available which are great for most West Australian conditions.

You might prefer to wear sneakers on your walk. They do let in a lot of dirt though and tend to wear out quite quickly on the rough surfaces of a bush track. Sturdy sandals have proven to be a good substitute for shoes when feet have blistered, and for beach sections. You are welcome to bring two pairs and alternate.

The main thing is to make sure you know your footwear well – try them out in a variety of terrains and do a few long walks (15 – 20km) in them before the Cape to Cape walk. We cannot emphasise enough that you have well worn in shoes or boots, good socks, and first aid for the prevention and treatment of blisters.

Preventing blisters: To prevent blister formation, we highly recommend using 'fixomull' or a similar tape on heels and toes where rubbing is likely to occur – ask for it at your pharmacy. Some walkers also wear two pairs of socks to prevent blisters forming – a thin inner pair and a thicker outer pair. Others swear by Hikerswool applied between toes and over pressure points.

The principle of blister prevention is to transfer any friction, caused by the movement of your foot inside your shoe, onto the fixomull tape or the extra sock, rather than onto your skin. If you know that your feet have a tendency to blister in certain spots, tape them before you walk. We are happy to help you with this. If you feel any rubbing or a 'hot spot' whilst walking, the

best thing to do is stop and do something about it. In all instances, prevention is better than cure. Blisters are very difficult to dress so that you are able to walk comfortably.

Treating blisters: Blister treatments vary and you may have your favourites. The second skin variety seems good, though you will also need good tape to keep it in place. Second skin treatments often have a sterile gel pack that pads and protects the blister from further friction. They can also be used as a (more expensive) preventative measure. Blister Block or Compeed are examples of this type of dressing.

A thick moleskin type plaster is also good to carry for blister treatment. Holes can be cut into moleskin to fit around a blister and a plaster put on top of that. This way there is little pressure put on the blister itself.

Walking poles are very popular these days – especially the lightweight aluminium shock absorbing type. They help to take some pressure off your knees going downhill and can help you get uphill too! However, if you have good knees and strong legs you may not need them.

A lot has been published about the pros and cons of walking poles – we're sure you can get the full story from the net. If you do choose them it's worthwhile practicing how to use them correctly so you get their full advantage. Try to use your arms as much as possible – by placing the poles opposite arm to leg and applying pressure as you step forward. Find someone knowledgeable in the shop where you purchase them to give you some tips. We can always help you when on tour.

Just in case...

We hope that you do not need to cancel your booking. However, if you do, our cancellation fee, based on the notice given prior to the departure date, is:

- More than 12 weeks: \$50 administration fee
- 6 to 12 weeks: loss of deposit
- 4 to 6 weeks: 25% of full tour cost
- 2 to 4 weeks: 50% of full tour cost
- less than 2 weeks: 100% of full tour cost, no refund

Stirling Ranges Track Guided Walking Tour
Level: Moderate/Challenging

Any questions?
